

## CLAIMS

1. Building for a group housing facility in the form of a building body divided into a housing section (1) with a number of housing units (4-12) and a  
5 common unit (2, 3), characterized in that the building body in its outer shape is essentially symmetric around a standing central axis (19), for example with a circular or polygon shaped periphery, and exhibits a roof (25), wherein the housing units are arranged as sectors in a ring-shaped peripheral section, that the common unit comprises at least a central  
10 common unit (2) arranged on the inside of the housing section, that the central common unit comprises a centrally placed pool area with a central pool (28) and a common ring-shaped walking space (33) around the pool and between the pool and the housing units, and that the roof is light transmittable over at least parts of the common unit.
- 15 2. Building according to claim 1, characterized in that the ring-shaped peripheral section comprises a second common unit (3).
- 20 3. Building according to claim 1, characterized in that a shielded yard place (22) for every housing unit (4-12) is arranged toward the central common unit (2).
4. Building according to claim 1, characterized in that patios (21) are arranged on the outside of the building.
- 25 5. Building according to claim 4, characterized in that the outer wall (13) is partly retracted in order to form a patio under roof for every housing unit (4-12).
- 30 6. Building according to claim 2, 3 and 4, characterized in that the building is divided into a number of leisure areas that are positioned in a ring-shaped manner around the central axis (11), namely a radially outer first

leisure area with the patios (21), a second leisure area with the housing units (4-12) located radially on the inside of these, a third leisure area with the yard places (22) placed radially on the inside of the housing units, a fourth leisure area with the ring-shaped walking space (33) placed on the inside of these  
5 and also a centrally located fifth leisure area with the pool (28) that extends around an island (30) from which a central pillar (20) extends along the central axis (19).
